of cycle times*

BENEFITS

Ease of transport thanks to the electrical drive, even on uneven terrains and narrow spaces

Precise and repeatable milk distribution to the calves . Possibility of manual dosing.

Simply and fast preparation of milk powder thanks to the effective and rapid mixer system

Flexible and precise heating system to get milk at the right temperature at the right time

Strength, thanks to the parts chosen to last over the time and in the most difficult working conditions

Ease of cleaning thanks to the specific program and to the washing ball

100% MADE IN ITALY
